

# How Trees Help

by ReadWorks

Photo Credit: Angelo DeSantis

Did you know that trees are helpers? Trees are plants that clean our air.

There is a gas in the air that can be dangerous to people. Tree leaves take in that gas. The leaves use that gas to make food for the tree. Then the leaves give off a clean gas. The clean gas goes into the air for us to breathe.

Trees also give us shade on hot days. Trees give us food to eat. Trees give some animals homes. Thank you, trees!
