

Your Five Senses

by Rachelle Kreisman

People have five senses. They are taste, smell, sight, touch, and hearing.

Your senses help you understand the world. Does that grape taste sweet? Your tongue tells you. Does the grape have a sweet odor? Your nose picks up the smell.

You see that the grape is red. Your eyes bring you sight. Your fingers feel that the grape is smooth. That is touch.

Did you drop the grape? It makes a plop as it hits the floor. That sound makes something inside your ears shake. The shaking helps you hear the sound. That is the sense of hearing.

Name: _____ Date: _____

1. How many senses do people have?

2. What part of your body picks up smells?

3. What sense do your eyes bring you?

taste

sight

4. What part of your body helps you hear things?

your fingers

your ears

5. What part of your body tells you that a grape tastes sweet?

The part of your body that tells you a grape is sweet is

6. What did you learn from "Your Five Senses"?

7. Draw a picture of a person using one of his or her five senses to learn about a grape.
